18ml cod. E15-21
7ml cod. E5-21

Green: is a mixing color for permanent make-up and microblading pigments. The Green color of Biotek can be added to another color, in the capsule, to make it colder. Green, added to another eyebrow color, is ideal for correcting red eyebrows.

Odra

18ml cod. E15-22
7ml cod. E5-22

Odra is a corrector for permanent makeup and microblading. Odra color by Biotek is used to correct eyebrows turned to gray and purple. Use it pure and apply it only in the areas to be corrected.

MIXING & CORRECTORS

Safari

18ml cod. E15-23
7ml cod. E5-23

Safari is a permanent makeup and microblading corrector.

Biotek's Safari color is used to correct old PMU treatments on the lips. It is ideal for covering dark areas due to the deep implantation of pigments.

Orange Red

18ml cod. E15-24
7ml cod. E5-24

Orange red is a corrector for permanent makeup and microblading. The Biotek Orange Red color is used to correct and neutralize dark pigmentation on lips. Apply Orange Red pure to the areas where the lip is darker and then, in the same session, cover the entire lip with another color from the Biotek range.

White

18ml cod. E15-16
7ml cod. E5-16

Biotek's White pigment can be used to create beautiful highlights on lips, eyebrows and paramedicals procedures.
